

INSTRUCTIONAL DESIGN COURSE OVERVIEW

Maximize your workplace performance by upgrading your e-Learning and traditional classroom curriculum

COURSE OVERVIEW

How to derive the maximum benefit from your organization's human capital? Simple: build maximum value into your training curriculum. Of course, that's easy to say but can be incredibly complex to put into practice. That's where we come in. Let TBD Consulting teach you how to upgrade your e-Learning and traditional classroom curriculum.

myCOREformance™ Instructional Design is a 3-day course that focuses on instructional design techniques that maximize workplace performance.

WHO SHOULD ATTEND

- Training department managers
- Instructional designers
- Trainers and facilitators who routinely create training
- IT professionals charged with creating computer training

COURSE TOPICS

- Adult-Learning Theory
- Accelerated-Learning Techniques
- Analysis of Performance Problems
- Design of Instruction

COURSE OBJECTIVES

After completing this course, participants will be able to:

- Understand how training is not just a slide-driven lecture but an experience that leverages adult-learning principles and accelerated-learning techniques to ensure engagement in the learning.
- Analyze an employee performance problem to determine the source and possible solutions to the issue
- Design objective-driven courses that target the needs of the organization thereby delivering value.
- Develop two types of training materials, storyboards that facilitate further development of e-Learning and facilitator guides for instructor-led training or webinars
- Implement and evaluate training curriculums
- The optional module on the Arrangement by Design® (ABD) software allows your personnel to master the use of ABD, TBD's powerful and time-saving software for creating facilitator and participant guides.
