

## Learning Innovation Campus Second Life® Rentals

### Virtual World Incubator

The mission of the Learning Innovation Campus (LIC) in Second Life® is to foster and support the activities of like-minded individuals and companies who are interested in being part of a campus dedicated to people development and learning. This is a great way for those new to Second Life® to take their first steps in establishing your virtual world footprint, or for those who want to belong to the LIC community.

As part of the Learning Innovation Campus (LIC) mission, we have made available a limited number of parcels (land) for private office or “create your own space” leasing. These parcels are available for individual, non-profit or corporate use for groups that are focused on education, people development, coaching or exploration of learning effectiveness.

### Medium Parcel Rental

- 549 prim each, 2400 meters sq
- Cost \$100 USD per month
- Create your own custom signage
- Build your own unique training platforms above 250 meters
